

Headsets for IP Softphone and PC Audio Interface

Avaya offers a complete range of ergonomically designed communication headsets and amplifiers to use with any PC application. These Voice over Internet Protocol (VoIP)-based solutions are great for in the office or on the road—and great for hearing your PC's sound without listening through computer speakers.

A full line of professional and contact center solutions is available for dedicated PC use. To communicate solely via a PC interface, choose a USB adaptor. Add a Switcher and gain the option to switch between a traditional telephone and your PC.

Whether you use your headset to listen to Web-based training, play a DVD, or work in a sound-filled PC application, you are assured superb sound quality, durability and all-day comfort. Avaya headsets are designed for maximum comfort in styles that suit all wearers and usage patterns.

Choosing a headset is as easy as 1, 2, 3.

1. Identify whether you want the all-digital USB interface or the sound card interface.
2. Choose an headset connection based on compatibility and features.
3. Choose the headset style that best suits your needs. (For instance, noise-canceling headsets are great in a busy office or when using VoIP telephones.)

Research shows that headsets help reduce neck, upper back and shoulder tension, and also help increase productivity*. So regardless of the headset you choose, you will notice a big difference!

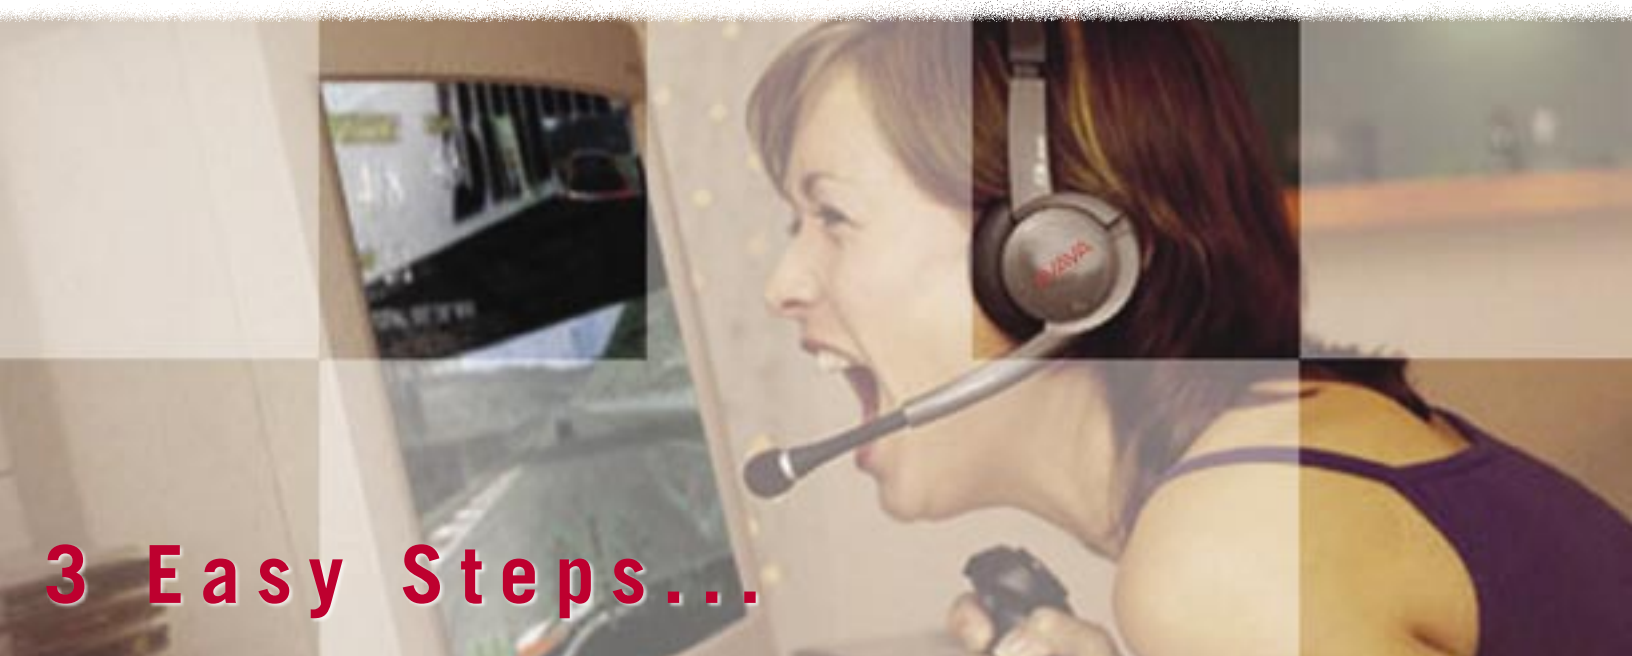

* "Headsets increase knowledge worker productivity 22%." Plantronics, November 2003
